What is this product?

TYPE

The product is a sub-fund of OTP Global Funds SICAV, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg.

TERM

The Fund is established for an unlimited duration. However the Board of Directors may decide to close this product under certain circumstances.

OBJECTIVES

The Sub-Fund aims to achieve capital growth over the medium to long term. It seeks to give investors exposure to returns from global developed equity markets.

The Sub-Fund invests mainly in developed equity markets. These markets are the countries that MSCI defines as developed.

It may also invest up to 10% of its assets in emerging markets. For this Sub-Fund, emerging markets are the countries in the MSCI Emerging Markets Index.

The Sub-Fund may gain exposure through:

- actively managed equity funds,
- passively managed equity funds and ETFs, and
- direct equity investments (to a lesser extent).

The Sub-Fund will invest at least two thirds of its net assets, directly or indirectly, in equities or equity-type securities of companies that:

- are registered in developed-market countries,
- carry out most of their activities there,
- generate most of their revenue there, or
- are listed on a regulated market in a Target Country.

The Sub-Fund may invest up to 10% of its net assets in equities or equity-type securities of companies that do not meet the criteria above.

The Sub-Fund may invest up to one third of its net assets in fixed-income or fixed-income-type securities that meet the same developed-market criteria as described above.

It may also invest up to 10% of its net assets in fixed-income securities of issuers that do not meet these criteria.

The Sub-Fund may invest more than 10% of its assets in undertakings for collective investment (UCIs).

However:

- no more than 10% of its assets may be invested in other sub-funds of the same UCITS (cross investment principle);
- no more than 20% of its assets may be invested in a single UCITS or UCI; and
- investments in UCIs other than UCITS may not exceed 30% of net assets in total.

The Sub-Fund may invest in:

1. UCITS or UCIs not linked to the Fund,
2. UCITS or UCIs linked to the Fund, and
3. other sub-funds of the Fund.

A target sub-fund may not invest back into the acquiring sub-fund.

The Sub-Fund is actively managed.

The following composite benchmark is provided for comparison purposes only and does not restrict the Sub-Fund's investments or the discretion of the Investment Manager:

- 10% MSCI US Government Bond Index 1M-1Y (MFGOUSST Index)
- 90% MSCI World Net Total Return USD Index (NDDUWI Index)

The Investment Manager may invest in securities that are not included in the benchmark and may also deviate materially from the benchmark's asset allocation.

The Sub-Fund may use financial derivative instruments for investment and hedging.

Derivatives may include, for example, futures, options, or swaps.

Any leverage created through derivatives will be kept within the limits set out in the investment restrictions. The Sub-Fund does not aim to generate excessive leverage.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 5 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

The essential risks of the investment fund lie in the possibility of depreciation of the securities in which the fund is invested.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Please refer to the Prospectus for more information on the specific risks relevant to the product not included in the summary risk indicator.

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: Example investment:		5 years HUF 4 000 000		
		If you exit after 1 year	If you exit after 5 years	
Scenarios				
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.			
Stress scenario	What you might get back after costs	HUF 1 738 220	HUF 1 591 250	
	Average return each year	-56.5%	-16.8%	
Unfavourable scenario	What you might get back after costs	HUF 3 205 590	HUF 4 482 830	This type of scenario occurred for an investment in the proxy between September 2017 and September 2022.
	Average return each year	-19.9%	2.3%	
Moderate scenario	What you might get back after costs	HUF 4 444 630	HUF 6 009 710	This type of scenario occurred for an investment in the proxy between December 2020 and December 2025.
	Average return each year	11.1%	8.5%	
Favourable scenario	What you might get back after costs	HUF 5 757 110	HUF 7 010 000	This type of scenario occurred for an investment in the proxy between March 2020 and March 2025.
	Average return each year	43.9%	11.9%	

The stress scenario shows what you might get back in extreme market circumstances.

What happens if FundSight S.A. is unable to pay out?

You would still be paid in case of a default from FundSight S.A.. However, there is no guarantee in place against the default of the Fund and you could lose your capital if this happens.

The Sub-Fund's assets are held with CACEIS Bank, Luxembourg Branch and are segregated from the assets of other sub-funds of the Fund. The assets of the Sub-Fund cannot be used to pay the debts of other sub-funds of the Fund.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- HUF 4 000 000 is invested.

Investment of HUF 4 000 000	If you exit after 1 year	If you exit after 5 years
Total costs	HUF 99 200	HUF 719 071
Annual cost impact (*)	2.5%	2.5% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 11.0% before costs and 8.5% after costs.

Composition of costs

Conversions between sub-funds are subject to a fee of maximum 1.00% of the Net Asset Value of the shares to be converted.

How long should I hold it and can I take my money out early?

Recommended holding period: 5 years.

The recommended holding period was chosen to provide a consistent return less dependent on market fluctuations.

Applications for subscriptions, redemptions and conversions will be dealt with on each Valuation Day. Applications for subscriptions, redemptions and conversions must be received by the Administrator not later than 14:00 CET Luxembourg time to be executed on the same Dealing Day. Applications received after that time will be processed on the next Valuation Day and will normally be settled within 3 business days following the Valuation Day.

How can I complain?

In the event a natural or legal person wishes to file a complaint with the Fund in order to recognize a right or to redress a harm, the complainant should address a written request that contains description of the issue and the details at the origin of the complaint, either by email or by post, in an official language of their home country to the following address:
